

Workout Injury Risk Report

2026-07-25 01:16

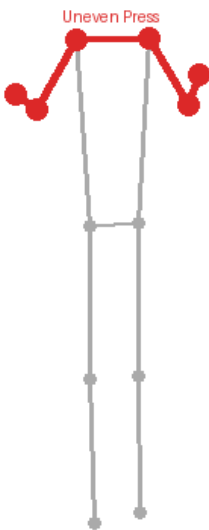

Workout Summary

Duration: 00:18

Reps: Press: 6

Mishaps & Injury Risk

Uneven Press

During your press, one arm was significantly behind the other. This indicates that the load was not being shared evenly between both sides. If uncorrected, this asymmetric loading could put strain on the shoulder and spine on the side that is compensating for the imbalance.
