

Workout Injury Risk Report

2026-07-26 22:57

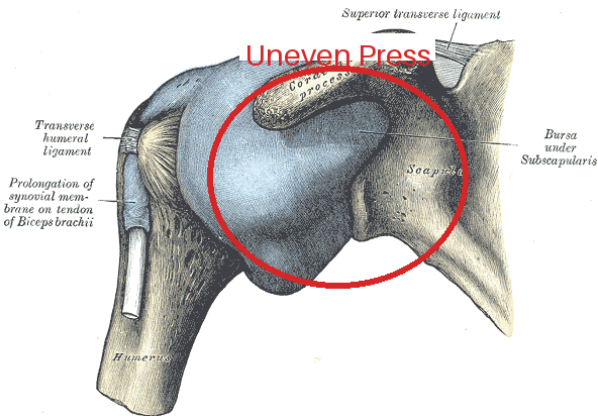

Workout Summary

Duration: 00:11

Reps: Press: 5

Mishaps & Injury Risk

Uneven Press

During your press, we noticed that one arm was significantly behind the other, meaning the weight wasn't being shared evenly between both sides of your body. If this continues, the asymmetric loading could put extra strain on the shoulder and spine on the side that's compensating for the imbalance.
